

**Feeling Unheard?
Tired of injustice?
Governments Not Listening to You.
Want to See Things Put Right?**

Finally, there are two fully Independent Senate candidates dedicated to voicing the views and opinions of everyday rural and city people alike.

Mature, experienced freedom-focused candidates who see how your liberty is being eroded by legislators focused on increasing their control over your property, your health, your money, your travel, your children, and yours and your children's future.

They see the dirty tricks being played by politicians who gain office by promising jobs yet are happy to see thousands who disagree with their mandates lose their jobs.

These politicians, people you elected who, at a whim stop your travel, deny your right to work, and force you to have medical treatments you don't want.

Len Harris and Debra Yuille are standing for the Senate in Queensland to voice your protests against this ever-increasing reduction of your rights, your liberty, your privacy and how you spend your money.

Len and Debra will stand up to be counted to oppose any proposed legislation that threatens your freedom.

Column A on your Senate ballot paper**

Attn: Home Owners...

Who Really Owns Your Home?

The Great Government Land Grab Explained...

Since 1987, successive State Premiers have conspired together to eliminate Land Titles.

Today this means that even if you have paid off your home loan, you can't get a document that proves you own your own property.

So, who does and how did this happen – and why YOU should be very worried.

The underlying organisation that was used to do this was COAG which has no legal or Constitutional standing.

COAG conspired to amalgamate all land registrars into Electronic Lodgement Network Operators (privately owned companies), giving them the right to amend and even delete your property from these digital registries without your knowledge.

All titles are now stored in the cloud by privately-owned companies that are under no obligation to reveal any data to you. You can't even do an FOI inquiry for your own property.

All of this places uncertainty around your property and you have no way to prove that it is yours.

The Great Aussie Dream of Homeownership is Over!

The Silent Majority is running as an Independent Queensland Senate Group to reverse this legislation. Help us to help you by voting for us.
